

HYGIENIX 1000 SERIES VIRUS & SMELL KILLER

for a
Safe, Hygienic & Healthy
environment

WHY USE HYGIENIX ?

Airborne contaminants such as virus, bacteria, bad-odour, smoke and fumes from cigarettes and some household products are always surrounding us. And our constant exposure to these indoor air pollutants generate harmful effects on our health.

Now with the UrbanTec Hygienix1000 series, we can experience a safe, hygienic and healthy environment. Hygienix significantly reduce germs, bacteria and viruses in the environment. It also acts as an effective deodorizer against tobacco smoke, pet odours and other bad odours. And at the same time, it revitalises the stale air in the room.

Works silently

The UrbanTec Hygienix 1000 series does not use a fan or motor, so they are virtually silent.

Durability

The Hygienix 1000 series is designed to be durable as it does not operate with moving parts like fan or motor.

Decorative feature

The Hygienix 1000 series is specially designed for commercial use. Both the wall mountable and free standing unit designs complement easily with most indoor decorations.

Enriched oxygen

The Hygienix 1000 series produces fresh air, giving the room a pleasant, refreshing clean air environment.

Maintenance free

Hygienix 1000 series is maintenance free. Unlike other commercial models which requires cleaning and washing every few months. There is no need for routine chemical or water refill which easily incurs additional costs and labour. With the Hygienix 1000 series you can enjoy a hassle free fresh air environment.

Low power consumption

The Hygienix 1000 series operates at a very low wattage, therefore the cost of maintaining a clean air environment is negligible. For example, 24 hrs daily operation a month costs an estimate of S\$0.30.

No Timer Required, No Overheating

Since all Hygienix models are designed and built for robust continuous 24 hours operation, there is no timer required to pause operation as compared to air purifiers employing corona discharge methods. This is due to frequent overheating found in such products and a timer is installed to extend its lifespan.

WHY IS THE HYGIENIX EFFECTIVE?

It employs active cleaning technique. Enriched oxygen are produced to remove airborne contaminants by attacking the sources of pollution directly, thus removing the source of odour and germs problems.

PROVEN TESTS

Tests conducted by Singapore government testing organization reveal that this technology significantly reduce bacteria count in a given space.

FEATURES AND BENEFITS

Eliminates virus, bacteria and fungus in the air and on surfaces

Removes smells, bad-odour, smoke and fumes

Neutralizes toxins like CO, furniture fumes, etc

Repels cockroaches, mosquitos and flies

Revitalizes and refreshes stale air

Maintenance free
