Computer Networking has a great deal of advantages in sharing IT resources and provides basic backbone for multi-media data communication. Today, this concept has been extended to the Internet.

Appliance Innovation Pte Ltd has further extended the boundary to include Audio/Video/Lighting/Air-conditioner implementation right in the home or office not only to save money for buying much less Audio/Video components but also to enjoy the accessibility in every room or even at remote location for entertainment, information and surveillance.

Main Features and Advantage (For both Wired and Wireless Models)

- **Comfort & Convenience:** Multiple access of all Audio/Video/Lighting/Air-conditioner/Surveillance Systems in the comfort of your bed or sofa. For related product, find out more for our **All-in-one Remote Lighting Control System** to remote control, telephone control, computer control, internet control, alarm control, timer control and manual control of mainly lighting and air-conditioners.
- **Be Organised:** Allows more people to share one centralized Audio/Video Resources and also use ONLY one remote control to control everything (Eg. VCR/DVD/TV/Hi-Fi, Lighting, Air-conditioner, Fan, Curtain etc.). For other related product, find out more for our **Integrated Centralized Control System** for Lighting, Air-conditioner, Audio/Video Equipment and other Electrical Appliances etc.
- **Save Money:** No need to buy more A/V equipment for every room.
- **Save Energy:** All A/V equipment connected to the Server will save energy. For other related product, find out more for our **Energy Saver** for Air-conditioner, Lighting, Audio/Video Equipment etc.
- **Save Space:** No need to build or buy more cabinet for your A/V equipment in every room.
- **Enjoy your Sleep:** No more sleeping on sofa in the living room late at night while watching late night movie or program.
- **Sharing with No Interruption:** You watch DVD in your room, your children watch VCR in theirs, your parents watch Cable in the living room while your wife watch other program in the kitchen. All can look who is outside your house in the comfort of your rooms, kitchen or living room and continue to do what they are doing without running to the door to peep who is outside when the doorbell rings.
- **Surveillance for Your Car:** Have more eyes keep watch of your parked car against theft and vandalism with or without recording. For extended feature, find out more for our **16 Camera Hex Surveillance System** for local and remote internet access with tape-less 24 hour recording 7 days a week.
- **Reduce A/V Equipment Maintenance and Obsolescent Cost:** Only one set of A/V equipment is required versus several insolated A/V equipment.
- **Expandable:** System can be expandable to include Audio/Video Intercom and Linkable to computer and internet for communication and Audio/Video real-time playback and Surveillance.
- **Peace of Mind:** All systems that designed and manufactured by **Appliance Innovation Pte Ltd** are linkable to all conventional electrical appliances such as, Lighting, Air-conditioner, Audio/Video Equipment, Video Projector, Motorized Projector Screen and curtain, Video Camera, computer, internet, telephone, water heater, autogate etc. for intelligent control and monitoring regardless of brand or manufacturer. Most importance, they are **Backwards Compatible**. In other words, you do not have to throw away your existing appliances and buy a new one or adopt a new and unconventional electric wiring system (you have no control if the system fail) in order to implement all the Intelligent Home/Building features. You are in control because the conventional electrical wiring system is your backup.
