Remote Control Systems

**O E M
Welcome**

You will be able to see yet another **world's first new product** that will revolutionize a totally new concept in Lighting and Electrical Appliance Control !

Appliance Innovation Pte Ltd, a Singapore R&D Manufacturer, is launching a complete range of this new revolutionary product,

The RCS Multi-Function All-in-One Lighting Remote Control Systems

in the **HANNOVER MESSE '97 at HALL 8 EG booth A09**. There are 8 **RCS** product lines over 60 models available for Home, Office, Hotel and Intelligent Building to control Lighting, Air-conditional, Heater, Audio/Video Systems (TV/VCR/CD etc.), Security and Alarm Systems and other Electrical Appliances such as Fan, Water Heater, Motorised Curtain, Home Theatre Screen, overhead projector, Autogate etc.

The **RCS** is a Modular and Wireless Control Systems, It delivers "complete" and All-in-One control to All Electrical Appliances especially for Light, Fan, Air-con, TV/VCR/CD/Hi-Fi etc. The **RCS** is a Multi-Purpose, Multi-Function and Multi-Channel systems. It allows six types of control, namely,

- | | | |
|--------------------------|-----------------------------|----------------------------|
| 1. Remote Control | 2. Timer Control | 3. Alarm Control |
| 4. Manual Control | 5. Telephone Control | 6. Computer Control |

The basic **RCS** system consist of a credit card size Programmable Controller with LCD Display and built-in alarm clock together with one or more wall switch replaceable Remote Wall Switch or Dimmer to control 5 Home or Office electrical gadgets including 16 to 85 combinations of lighting, dimmer, fan and water heater circuit.

The **RCS** system is suitable for all types of people from small, young to old or handicap in-door or out-door. It is not restricted to control only ON or OFF of the existing electrical appliances. It is capable to dim the light, control the fan speed, control the volume and channel or even the color of the Audio/Video equipment just to mention a few.

For extended usage, the **RCS** system can be expanded with a 4-Channel Interactive Voice Telephone Interface module which enables the user to use any type of telephone or handphone at anywhere using security code as password to control the assigned electrical appliance. For security and surveillance monitoring and control, the system can be interfaced to a 8-channel PC Interface for centralised control and real-time monitoring.

The main advantage of the **RCS** is low cost and the ease for installation as the Remote Wall Switch can directly replace the existing light switch without messy re-wiring. It renders all other existing bulky remote controls for TV/VCR/CD/Hi-Fi and Air-con redundant by integrating them into just ONE credit card size Personal Remote Control in your pocket to control all your home and office electrical appliances and lighting. Also worth mentioning is that it is user programmable, so that the user can customise their own control configuration for personal use or restrictive use for children, hand-free control if you are not around or too tired to bother or re-arrange all the lighting configuration at any time you want without getting an electrician to do the re-wiring. Other benefits and handy features is that, you do not need to change the remote control battery very often for it should last you for 2 to 3 years. It is a clock with alarm control too, so the **RCS** can wake you up in the morning. Finally, No maintenance is required and its minimum life span is 27 years (can a TV last that long ?).

A Revolutionary Bed-Side Master Controller with Clock specially designed for the Hotel industry with the aim to replace the conventional bed-side panel in the hotel room to control lighting, air-con, TV, VCR, radio and curtain is also available.

The **RCS** product is designed for the Home, Office, Hotel and Intelligent Building for Automation, Security and Information Technology. Its fundamental aim is to revolutionising the classical manual light switch and the hotel room bed-side panel, a step forward from our continuing human effort for a better and modern life-style.

Would you want to buy a TV without remote control ? If the answer is "NO", then you need the next generation of Lighting and Appliances Control -- The **RCS** Remote Control Systems.
